EDR 710 MINI CALIBRATION ROBOT FOR ALL BRANDS OF DIESEL INJECTORS

The technological design of the EDR 710 mini calibration robot enables precise semi-automatic adjustment of any BOSCH, VDO, DENSO and CAT Common Rail injector.

After a measurement process of approximately **7 minutes**, the diesel specialist can **assemble the Common Rail injector** secure in the knowledge that **the configuration of such is perfect**, which **guarantees the subsequent performance of the injector on the test bench**, always in accordance with the original manufacturer values.

The high **precision of all of the EDR 710 components** guarantees extraordinary **repeatability in the configuration process**.

Thanks to the ongoing development of **new configuration records for all of the systems** and to the generation of **new accessories**, the **EDR 710**

is equipped to meet any market requirements, and the new records can be directly **updated onto the mini calibration robot software, over the internet**.

In addition, with a **simple, intuitive, interactive and dynamic system of use**, the diesel specialist calibrates the components **quickly and efficiently**, therefore obtaining a **lot of profitability for your business**.

All of the **Lucas Diesel Systems** testing equipment is designed with a strong commitment to **environmental care and to guarantee the minimum risk for the diesel specialist professional**.
