

# Lucas

The advertisement features three Lucas wiper blades of different sizes and designs. One is a large beam blade, another is a smaller beam blade, and the third is a traditional hook blade. They are set against a background of a wet road with a white dashed line, a lightning bolt in the sky, and a surface covered in raindrops. The bottom half of the image is a solid green color.

## Trusted Performance

The Lucas Wiper Blade programme offers a comprehensive range of quality blades designed to serve the diverse requirements of the modern automotive aftermarket.

Conventional style wiper blades, modern flat blades and new hybrid style blades are all available in the trusted Lucas range.

The technology behind Lucas wiper blades has developed continuously to adapt to the changing styles of modern vehicles. Curvature of windscreens and aerodynamic designs have had a direct effect on the design of Lucas wiper blades.

The Lucas Wiper Blade range gives the customer an opportunity to sell to all levels of the marketplace. With Premium and Standard conventional blades plus Clearvision DirectFit and MultiFit blades, every price point can be catered for.

Whatever the application, Lucas can offer a solution that meets both customer requirements and budget.

## For Every Application

### Conventional Standard and Premium Blades

The Lucas conventional wiper blade provides a direct replacement for the original blade fitted at point of manufacture. The blade incorporates a high content of natural rubber combined with a synthetic additive to prolong lifespan. The range includes Standard and Premium wiper blades to meet every budget. Premium blades offer 8mm rubber and a riveted bridge for increased performance.

### Clearvision DirectFit and MultiFit Flat Blades

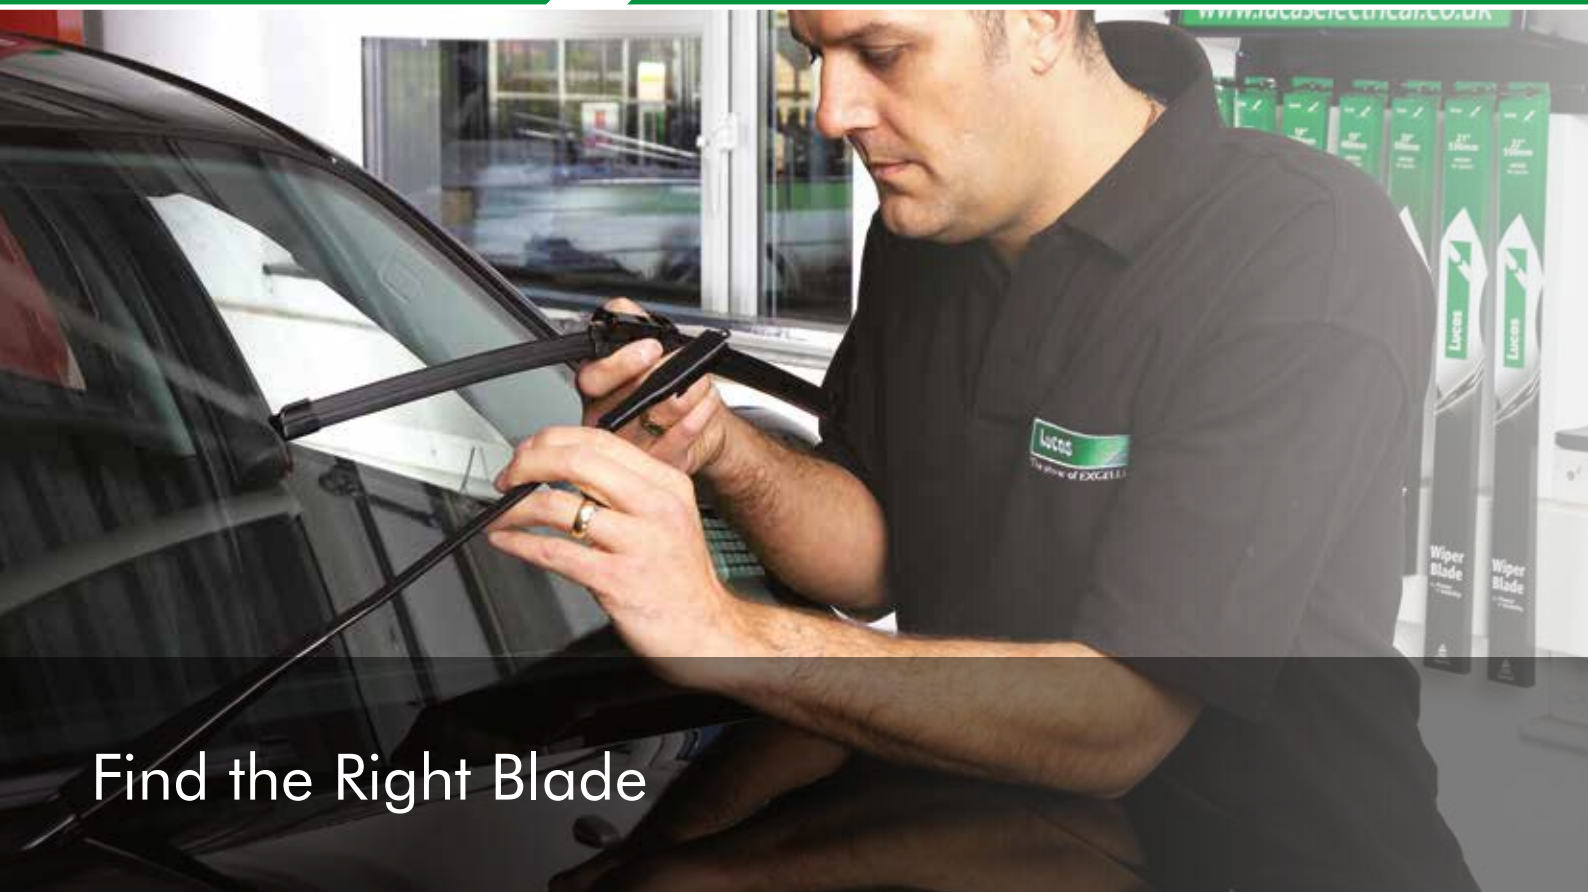

Lucas Clearvision DirectFit and MultiFit blades feature flat blade wiper technology with a modern, aerodynamic design and centre spoiler for improved performance. DirectFit wiper blades are application specific and easy to fit, straight out of the box. MultiFit blades offer interchangeable adaptors for multiple applications. Both deliver an ideal aftermarket replacement or upgrade.

### Clearvision Hybrid Blades

One of the latest technological advancements to be introduced to the market is the hybrid wiper blade. This technology combines the aerodynamic performance of a flat blade, with the wiping performance of a traditional conventional blade. This creates a stylish looking blade that reduces wind lift at high speed whilst still providing an even load distribution across the windscreen.

## Lucas **STANDARD** Conventional Wiper Blade

Lucas standard conventional blades are the clear choice for both drivers and fitters, delivering renowned Lucas quality and performance at economical prices.

The Lucas conventional wiper blade provides a direct replacement for the original blade fitted at point of manufacture.

The blade incorporates a high content of natural rubber combined with a synthetic additive to prolong lifespan.

Available in a range of sizes from 12" – 24" to cover over 80% UK vehicle Parc.

The smart design incorporates a one piece bridge and quality 6mm rubber to deliver performance and an economical price point.

All Lucas wiper blades are graphite coated rubber for smooth, quiet performance straight out of the box.

## Lucas **CLEARVISION** **DIRECTFIT** Flat Blades

### A real performer

The Lucas Clearvision DirectFit wiper blade range has been introduced to deliver a premium quality blade that performs as well for your business as it does on the vehicle.

### Faster and simpler installation

Fit straight out of the box with no time consuming adaptor changes required, saving your business increasingly valuable man hours. Video fitting guides are also available by scanning the QR code on the box.

### Performance and style

Featuring an aerodynamic centre spoiler and graphite coated blade for smoother, quieter performance.

### Extensive range

The range of 56 part numbers covers over 90% of vehicles fitted with flat blades including new Volkswagen and Audi models.

### Easy identification and stocking

New colour coded packaging and online application data make finding the blade you need easier and quicker than ever.

### MultiFit option

MultiFit blades are also available for an increased vehicle coverage from a smaller range of stock, if required.

### A comprehensive range of rear blades

Rear wiper blades are now beginning to incorporate the same flat/beam technology that has changed the design of front wiper blades in recent years. Reflecting these changes in the aftermarket, the Lucas rear blade range has grown to include a host of new flat blade part numbers covering a further 1.5 million vehicles on the road and increasing the total coverage to over 15 million vehicles.

Online ordering is also available via TecCom for 24/7 orders

Stocking, selling or fitting, we're here to help

From stock packs to fitting advice, our experts are on hand to help every step of the way.

### Trust Lucas

With over 135 years of innovation and development, Lucas have been continuously trading longer than any other automotive component brand in the world.

# Trust Lucas

# The Driving Force Behind The Lucas Brand

The Lucas brand is one of the leading forces in the automotive aftermarket, delivering a broad range of premium quality products. Building on a heritage of over 135 years in the automotive industry, Lucas now boasts market-leading vehicle parc coverage for Automotive Bulbs, Batteries, Engine Management & Ignition, Mirrors, Rotating Electrics, Switchgear, Warning & Safety, Window Regulators and Wiper Blades. The Lucas brand represents superior engineering and service excellence throughout its product portfolio.

Customer demand for quality products, keen pricing and shorter lead times is met with a constant investment in product range development and the highest quality manufacturing, backed by online cataloguing and first class marketing.

The success of Lucas is built upon a deep commitment and understanding of the automotive aftermarket's needs and demands, which allows the brand to meet and exceed customer expectations.

With 135 years of innovation and development, Lucas have been continuously trading longer than any other automotive component brand in the world.
